

Ozsmart, device for ozone therapy, is an active therapeutic medical device, that is intended for a supplementary therapy in the clinic and outpatient practice and it is **the adequate response to the requirements for modern ozone therapy.**

Regeneration and antiinflammation effects rank among main ozone benefits. Ozone therapy relieves from pain, enhances oxygenation of tissues, supports immune system and destroys bacteria, viruses and fungi.

- mobile and both ergonomically and dimensionally compact solution
- capacity touch 7" display
- RFID card reader —log in through authorization card

- sophisticated control of nozzle flow
- multi-language versions for operators
- catalytic ozone destructor
- complex autotest at every switch on of the device

Ozsmart provides a wide range of ozone therapy spectrum:

- Major autohemotherapy
- Minor autohemotherapy
- Sampling for rectal and vaginal insufflation
- Bag filling
- Ozonization of liquids

Indication

- Inflammatory diseases (bacterial, viral, mycotic)
- Ischaemic states
- Weakened immune system
- Chronic pain

Technical parameters	
Name of the device	Ozsmart
Source of supply	230 V/50 Hz
Input power	100 VA
Ozone concentration	1µg/ Nml - 80µg
Flow rate	0,2 or 0,8 l/min acc. to the mode
Dimensions (W x H x D)	380x310x135 mm
Weight (basic unit)	13,6 kg
Product category	II b

Manufacturer:

ZAT a.s.
K Podlesí 541
261 01 Příbram
