

Rack RB0005R1 of Control System SandRA Z200 line

Rack **RB0005R1** is a **high-quality** and **durable** rack designed for fitting with boards from the **Z200** series. This series excels especially in the areas of industry and conventional power industry. The rack enables power supply of the boards and also transfers data via **two buses**. The **upper bus** is used to bring IO signals, their power supply and to bring technological signals to the inputs of further IO boards. The **lower bus** then provides internal data transfer among the boards inserted in the rack and ensures distribution of a unified supply voltage for powering the internal logic of the boards.

- 19 "rack- half width 10"
- Serial bus (double star)
- Redundant power supply
- Easy Power Supply
- Rack dimensions (W x H x D) 254 x 266 x 298 mm
- 10 positions for boards in total
